

13.4.52

Dear Hayes,

I am writing you from the seaside, where the children are at present in convalescence; I had to rush here because the youngest child ate a safety pin (open) ,which has now come out spontaneously without trouble. I shall answer your letters from Milan; meanwhile I am enclosing the invitation for Pallanza. We have been lately seeing thing^s/similar to the ones you mention; two papers are in preparation, one for Genetics (L.C.&L.) and one for JGM (C.L.L.). The latter is not ready ; of the former, a copy is being retyped for you and will be soon sent from Milan. I hope the JGM manuscript may be ready by the end of the month. Shall we send the papers -yours and ours - jointly to JGM, or would it be enough to send them separately and ask the editors to publish them on the same issue ?

Yours sincerely

L.Cavalli
